

DISSERTATION SUBMISSION

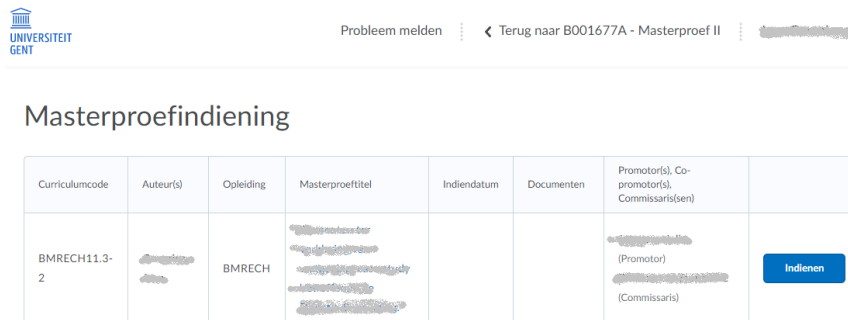

If your curriculum for the current academic year includes a master's thesis, you will automatically be registered for a specific info site on Ufora. This course provides more information about various aspects of the master's thesis and will be used to keep you informed of all relevant messages and activities. Finally, you will also have to submit your master's thesis electronically via the 'Dissertation submission' tool within this course. This tool is also used in some study programs to have your bachelor's thesis or research paper submitted.
